

Name of the Event: Students' enrichment programme by 2nd, 4th and 6th semester students

Topic: Honours Syllabus based topics presented through Power point presentation

Invited Speakers: Students from different semester

Date: 14th July 2021

Time: 1.00 pm onwards

Webinar Platform: Google Meet

Organised by: Department of Sociology

Number of Participants: 100 (College students list attached only)

Summary:

To unveil the potentialities of departmental students' Department of Sociology organised Student's enrichment webinar. In the webinar students, particularly honours students, of 3 semesters discussed and analysed varied social issues through power point presentation. This time their focus was on the environment and related issues. They dealt with different environmental pollution that are relevant when studying society and social life. Environment studies is all about learning the way we should live and how we can develop sustainable strategies to protect the environment. It helps individuals to develop an understanding of living and physical environment and how to resolve challenging environmental issues affecting nature. To create awareness among today's generation on pressing environmental problems, the University Grants Commission (UGC) has made it mandatory for the universities to introduce a course in environmental studies and teach students about the ecosystem, pollution and problems concerned with the environment. Let us discuss the dire need to include environmental studies in the course curriculum. Global environmental changes—such as pollution, climate change, biodiversity loss, and freshwater decline—affect people worldwide, with impacts that are not just physical, but also social and economic. These changes affect family and community stability, social relationships, health, and sometimes survival. Students discussed various environmental issues, causes and consequences of such pollution and its impact on community living. This webinar had an intense effect on the participants and on the audience as well. The students gained confidence in their presentations.
