Announcement

Satellite Telemetry is an increasingly utilised technology in *Wildlife Research,* and current devices can actually track individual animal movements at unprecedented spatial and temporal resolutions. Are you passionately eager to learn the behaviour of tigers, leopards or elephants ?? Do you get amazed by the astonishing movement of the migratory birds?? Are you all interested to have a promising future and career in the field of " *Satellite Telemetry* "

Then do join a webinar live on *ZOOM* on *22nd December at 7 p.m.* on *Development of Satellite Telemetry in Wildlife Research* by *Supratim Dutta, Project Associate II, Wildlife Institute of India, Dehradun.*

Glad to share with you all the flyer and registration link <https://forms.gle/QqjXKkBOGF7kZfWC7> of that *National Level Webinar on Research Methodology*

organised by

Department of Zoology, Surendranath College under *DBT-Star College Scheme, Govt. of India.*

Do register yourself and join us on coming Wednesday. All are cordially invited!
